

# **RADIOFREQUENCY RADIATION FROM WIRELESS COMMUNICATION SOURCES: ARE SAFETY LIMITS VALID?**

***ICBE-EMF-Sponsored Workshop at the Royal Society of Medicine in London  
June 14, 2023***

The International Commission on the Biological Effects of Electromagnetic Fields (ICBE-EMF) is a multi-disciplinary consortium of scientists, doctors and related professionals who are, or have been involved with research related to the biological and health effects of EMFs. Its purpose is to make recommendations to ensure the protection of humans and other species from harmful effects of non-ionizing radiation.
